

# Basperse DR-11

T E C H N I C A L   B U L L E T I N

**BASTECH**  
SERVICE • SAVINGS • SOLUTIONS

Basperse DR-11 is an anionic penetrating and dispersing agent designed for use as a digester pulping aid. The use of Basperse DR-11 will reduce rejects, increase organics in the black liquor which increases the BTU value, and decrease pulp extractables. The penetrating and wetting ability of Basperse DR-11 ensures the cooking liquor effectively penetrates the chips to ensure more uniform cooking.

## Applications

Basperse DR-11 is typically added to the white liquor at a rate 2–4 pounds per ton of pulp. Due to the diversity of mill configurations the specific point of application will be determined by your local sales representative.

## Storage and Handling

Basperse DR-11 becomes viscous below 75°F. Please store between 100°F and 150°F.

## Regulatory Status

Basperse DR-11 is manufactured in compliance with the regulations of the Food and Drug Administration as described in 21 CFR 178.3400.

## Packaging Information

Basperse is available in bulk, tote bins at 2200 pounds net, and 55 gallon drums with a net weight of 450 pounds.

### TYPICAL PROPERTIES

Appearance	Clear colorless liquid
Density at 100°F	8.2 to 9.0 ppg
Viscosity at 100°F	< 1000 cps
Solubility in water	Complete
